Addendum #1

Responses to RFQ Questions

for

Providing Project Management and Architectural Services for Fire Station Improvement Project

Proposed Question:

Is the RFQ requesting construction PM services and A/E services to be submitted together, as one team, or are they to be submitted/scored separately? Does Marysville Fire have a preference?

District Response:

The RFQ should be submitted as a single team. A&E firm that will also do project management or a project manager that partners with a firm that provides A&E services are both acceptable proposals. SOQ's will be scored, interviewed, evaluated, and selected as a single entity.

Proposed Question:

If a RFQ Proposer has no applicable construction management experience under current company name, is applicable experience from past employers/positions acceptable to include in RFQ response?

District Response:

Proposers should include all professional experience as it relates to the RFQ and the ability of its team members to complete the project.

Proposed Question:

Does this project have an established budget and secured funding? If so, can you please share the budget and/or fee?

District Response:

We do have an overall established budget of \$850,000 for 2026. Should this project exceed this amount it is expected to be completed in portions with additional funding in 2027.
